UNIVERSITI PUTRA MALAYSIA

1.0 Purpose

The purpose of submitting this paper is to:

- i. To seek for a collaboration with SMK Putrajaya Presint 8 (1) in terms of providing a participants for participating 'Green Avengers' program.

2.0 Introduction

Malaysia is a developing country and everybody is aware with various environmental threats that are happening throughout Malaysia. With our mission to be a developed country in 2020, there's a need to make Malaysia a sustainable for the future. So, the youngsters especially school children should be educated on the importance of our environment. As our resources are limited but our needs remain to grow, somehow we will hit a saturated point where we finally regret on what we did back then. In Malaysia, there is no environmental education being taught at school while actually we always knew that these youngsters are the one who will be living this land in the future.

This project aimed to spread environmental awareness among secondary school students and to initiate an environmental club at the school level so that they can continue the efforts even after the program.

2.0 Objectives of the program

- i. To spread the environmental awareness by hands-on learning and problem solving method among school students.
- ii. To help facilitate school students to form an environmental club for a sustainable initiatives in the future for school and community.
- iii. To provide an environmental workshop by the facilitator of Bachelor of Environmental Management students.

4.0 Organized by

9.0 Targeted Respondent

Secondary school students at the age of 13-15 years old. Requires around minimum twenty students.

10.0 Conclusion

Today, environmental field is emerging and it is actually at a tipping point for Malaysia to start putting an environmental education as one of the subjects in their school syllabus. But to be in that position, let's begin by creating a club where a group of students in school doing environmental related things and make it sustainable in the future. Education is simply the best tool in many circumstances so it is definitely a worthy investment.
